

## Documentation control for greater regulatory compliance

Whether it is internal or external, regulatory compliance is a cost of doing business. Now compliance just got easier with our extremely easy to use Maintenance Manager application. Feel confident during last minute inspections that your maintenance records are complete, approved and electronic.

### **Notifier Alert**

*With Data Innovations' unique, powerful Notifier application, your flagged events automatically integrate with Maintenance Manager.  
(For example, only 20 tests exist in a reagent bottle.)*

Is your lab **IM**powered™ ?

## Way beyond maintenance log books

Maintenance Manager provides electronic scheduling and documentation management for all of your laboratory equipment — from instrumentation to eye washes to fire extinguishers. Maintenance Manager presents steps to take while troubleshooting equipment in your lab, while procedure documents may be linked as attachments, including vendor instructions, website links, and movie clips, providing instruction and guidance during the performance of tasks.

- Networkable, electronic maintenance tracking and reminder system for all laboratory equipment
- Reminders based on time, number of tests performed (such as reagent bottle change) and more
- Guides users on proper procedures and incorporates failure logic
- Ability to document 'unscheduled' activities
- Supervisor approval and tracking
- Electronic archiving of maintenance logs including paper-based files
