WITH STRENGTH AND FLEXIBILITY, YOUR LABORATORY IS IMPOWERED™

LIS Backup Solution

The workload at today's clinical labs is increasing at a brisk pace. Many labs' test numbers have doubled or even tripled in less than a decade. In such an environment, downtime is a luxury you cannot afford.

We provide built-in backup capability to maintain continuous results production even when your LIS is unavailable.

That's where Data Innovations comes in. Along with our many products that eliminate mundane tasks, freeing up hundreds of man-hours, we also offer backup capability,

which is built into the Instrument Manager to maintain continuous results production even when your LIS is unavailable.

Features of the LIS Backup include:

- Automatically print chartable reports to ER and ICU printers during LIS downtime
- "Heads down" rapid order entry or mouse driven order entry from multiple network workstations
- Look up results and print chartable reports
- Print LIS downtime labels automatically or on demand
- Utilize same autoverification rules/processes during LIS downtime
- Quick conversion and recovery when LIS is operational again
- Hot-backup system ensures middleware redundancy
- Complete audit trail for full traceability

LIS Backup

With Instrument Manager™, your lab is IMpowered™ to meet demands now and in the future.
